Technical Support AutoCAD and other AutoCAD-related products are supported by Autodesk Customer Service representatives on the phone and in chat. Technical support for AutoCAD is provided through the Autodesk Knowledge Network (AutoKN) web site, where new features are added as updates are made. The AutoCAD Technical Support team consists of five functional areas. Each of these areas is staffed by AutoCAD technical support specialists, who are located in the US, Canada, the UK, and Germany. These locations are critical to AutoCAD and AutoCAD LT users because the support team is authorized to provide technical assistance for all of AutoCAD and AutoCAD LT. A unique feature of AutoCAD is AutoCAD Exchange, which allows users to exchange technical information through e-mail and the Internet. AutoCAD Exchange is available for AutoCAD and AutoCAD LT. To participate in an exchange, you must first contact AutoCAD support. Many users also purchase the add-on products from Autodesk Exchange, which may include upgrades and fixes from AutoCAD and AutoCAD LT. The availability of additional products varies depending on the type of license. Graphic items are typically drawn in a sequential order; however, there are tools available to the user to quickly change the drawing order. In AutoCAD LT, tools are available to reorder or manipulate the items, and to add new items. However, there is not a function to read the contents of the drawing from the drawing control bar. Programming AutoCAD includes its own scripting language, AutoLISP. VBA and Visual Basic for Applications (VBA) programming can be used to add custom scripts to AutoCAD. History AutoCAD 1.0 was released in 1987. AutoCAD 2.0 introduced under-the-hood changes that enabled it to be capable of all of its features. AutoCAD 3.0 added some new features, such as the ability to draw linear bearings, dimensionally accurate solids, feature links, dimension profiles, and much more. AutoCAD 4.0 added major new capabilities, including feature-based construction and constructional units, more and better option dialogs, the ability to draw closed solids and closed surfaces, and many other new features. AutoCAD 4.5 introduced an updated architecture 5b5f913d15

What's New in the?

Perferences: Placing a window on the Perferences area, shows info such as what is selected and on what layer, what is inside the current viewport, and if the drawing is in memory or hard copy. Each window can have its own window title, icon, and tooltip. (video: 1:02 min.) Clipping options: The Clipping options area, as shown here, includes different options for different user interfaces and allows you to choose how you want to clip and outline drawings. Sections and Lights: The addition of "Lights" to the sections menu in the menu bar, lets you add detail to existing sections and add lights to section lines. (video: 0:45 min.) 3D Navigation and Navigation Groups: Navigation Groups are now added in the same way as drawing objects and the existing navigation properties can be assigned to them as well. These allow you to easily reorder drawings in 3D space. The Batch UI: The batch UI option, which was introduced in AutoCAD 2020, is now fully realized in the AutoCAD 2023 release and allows you to add, change, or remove all properties of a selected object from one go. The new Batch UI allows you to batch: change the color of selected objects add or remove filters use a custom template assign properties and fill out options copy templates from other drawings Linking: The Linking area includes new options for linking drawings: You can now use ribbon tabs to link drawings and you can select any drawing you want in the Linked Drawing drop down list. In addition, you can now select any drawing to create a Linked Drawing, this is useful if you have multiple drawing files that you want to link together. Flowchart and Message Boxes: In AutoCAD 2020, the Flowchart box could only be used to create and edit flowcharts but it now works with any object. The message box allows you to include new options. Image-Based Styles: The new Image-based Styles feature can now be used with any object including flowcharts and pictures. In addition, the Image-based Styles feature also lets you: use default drawing styles reset styles apply styles to all objects in the
