WinMatrix is an application that enables users to convert their desktop into an animated background that is inspired by the first movie in the Matrix trilogy, The Matrix. When it is launched, the program will offer to start it automatically. However, users will also be able to do so manually. In either case, users will need to open the main window of the application, and then press the 'Start' button. As soon as the main window is open, users will be asked to select their Windows wallpaper. Once this is done, WinMatrix will load the animated desktop and start to load new images. The images can be changed by pressing the 'Change' button. These images can be changed by the user to their preference as well as by dragging them from the 'Browser' window to the 'Pictures' window. Additionally, users can use the 'Settings' window to change the 'Show' mode and the 'Loop' mode. In order to activate the Active Desktop, users will have to go to the 'Settings' window and enable it there. Once the desktop is active, the settings can be changed from the main window. Anytime the user wants to change the desktop animation, they will have to go to the 'Settings' window and choose the 'Animation' tab. Users can also enable fading out. In order to activate WinMatrix, users will have to press the 'Start' button, which will bring up the 'Help' window. Users can see what the application can do by pressing 'Details' on the 'Help' window. 4.5 3.0 5
